🎓 EDUCATION

Niis Group Of Institute Affiliated by Utkal University,
Bachelor's In Computer Application
09/2022 – 07/2025
bhubaneswar, india

KEMS
10 + 2 Affiliated Central Board of Secondary Education

🧠 SKILLS

Technical Skills Core Engineering Styling & Animation Tools & DevOps: | **Frontend Development:** React.js, Next.js, TypeScript, HTML5, CSS3 (BEM, SASS). | **Mobile Development:** React Native, Expo, React Navigation, Expo Router. | **Backend Development:** Node.js, Express.js, RESTful API Design, Serverless Functions. | **Database Management:** PostgreSQL, Prisma ORM, MongoDB, SQL Optimization. | **UI Frameworks:** Tailwind CSS, Material UI (MUI), Bootstrap. | **Motion & Interactions:** Framer Motion, Reanimated, CSS Animations. | **Version Control:** Git, GitHub (Branching, Pull Requests, Actions). | **Project Tools:** Axios, Postman, npm/yarn, Vite, Webpack. | **Deployment:** Vercel, Netlify, Render, DigitalOcean. | **Marketing & Growth:** Technical SEO, Google Search Console, Domain Management.

📁 PROJECTS

- Fi Horizon | Real Estate & Construction Platform
- Coffee Cafe App | Mobile Ordering System
- shahid khan | fullstack developer

📁 EXPERIENCE

My Web App, Self Employed Web
As I am unable to browse your specific live portfolio link directly due to server-side restrictions, I have drafted two high-impact ways to describe your Portfolio Web App for your resume.
Since your previous work involves React, Next.js, and Tailwind CSS, these descriptions focus on the technical implementation and the "Developer-First" features you likely included.

- **Architecture:** Engineered a high-performance, responsive portfolio using Next.js and TypeScript, achieving a near-perfect Lighthouse score for SEO and accessibility.
- **Deployment:** Optimized asset delivery via Vercel Edge Network, implementing automated CI/CD pipelines for seamless production updates.
- **Dynamic Content:** Integrated a headless CMS (or Markdown/MDX) to manage project case studies and blog posts, allowing for dynamic content delivery without redeployment.
- **UI/UX:** Developed a custom design system with Tailwind CSS, featuring interactive components and fluid layout transitions using Framer Motion.

Freelancer, Fi Horizon

- **Architecture:** Designed and developed a multi-page business application for a real estate and construction firm, moving beyond a standard landing page to a comprehensive structure including Home, About Us, Blog, and Contact modules.
- **Performance & SEO:** Implemented advanced **SEO strategies** and optimized site performance to ensure high search visibility and fast load times for client engagement.
- **Frontend Excellence:** Crafted a responsive, interactive user interface using **React and Tailwind CSS**, incorporating **Framer Motion** for seamless transitions and professional-grade animations.
- **Infrastructure Management:** Managed full-cycle deployment, including domain configuration for [fihorizon.in](#) and setting up professional digital communication infrastructure for stakeholders.

👤 SUMMARY

"Full-Stack Developer focused on **TypeScript, React, and React Native**. I bridge the gap between robust backend logic (Node.js/PostgreSQL) and interactive frontend design (Tailwind/Framer Motion). Passionate about performance optimization and building products that solve real-world problems."
